

## Upper School Summer Assignments

Happy Summer! While we know it is very necessary for students to have time to enjoy family, fun, and growth in many aspects during the summer, CFCA believes that our students can continue to keep their minds fresh and focused over the summer to encourage retaining knowledge gained during the school year.

This year, we are taking a different approach to summer work. All students in Grades 6-12 will have an IXL account (many already do) and will use their account to complete a Summer Boost program in both Math and ELA. For ELA, students will just need to complete the appropriate grade level plan. For Math, students will complete the plan for the class they will be entering. For example, if your student has completed Algebra I, they will follow the Geometry plan to prepare them for Geometry.

IXL recommends that students complete one skill each day for 20 days for each plan they are completing. Please keep this in mind as you have your student work on their summer assignments.

If you run into any questions or problems, please don't hesitate to contact me. Also, students were given their IXL Log In information during the last week of school, but if they do not know it or cannot find it, you can reach out to me at [kristilaviolette@cfcaeagles.org](mailto:kristilaviolette@cfcaeagles.org).

**\*Completing these plans is NOT optional – and successful completion of both plans will be given a grade in the 1<sup>st</sup> quarter of the 2024-2025 school year.\***

### MATH SUMMER BOOST PLANS:
